A COMPREHENSIVE TECHNOLOGY SOLUTION

In today's rapidly evolving world, ensuring the safety and well-being of students and staff in schools is a top priority. With advancements in technology, schools now have access to a wide range of solutions that can enhance security and communication within their premises. Our expert team is dedicated to designing, deploying, managing, and supporting complex technology solutions for businesses of all sizes. We understand that the solutions we create become the backbone of your business operations, and we are committed to meeting your needs every step of the way.

OUR SOLUTIONS

Communication & Network

- VoIP
- Carrier Services
- Intercom
- Cabling Infrastructure

Security & Safety

- Access Control
- CCTV Surveillance
- Smart Sensors

Construction & Drilling

- Directional Drilling & Boring
- Trenching
- Outside Plant Construction

VOIP

Hosted, On-Prem, Hybrid

A VoIP solution is one of the most important steps you can take to improve business communications. Some of the most common benefits include productivity improvements, scalability, management simplicity, and cost reduction.

CARRIER SERVICES

SIP Trunks, High-Speed DIA, Cloud Services

Carrier services offer businesses a comprehensive suite of solutions that enhance communication, data transfer, and operational efficiency. Our solutions range from SIP trunks to high-speed DIA to cloud services, and the benefits are endless, including cost-effectiveness, reliability, efficiency, and flexibility. We can tailor a solution to your needs and requirements to keep your school running smoothly.

INTERCOM

Paging, Mass Notification, Bell Schedules

Intercom systems offer a wide array of features and capabilities, including paging, mass notifications, and bell scheduling, providing instant and seamless communication between different areas of a location to enhance safety.

CABLING INFRASTRUCTURE

Copper & Fiber Optic

Structured cabling provides a solid foundation for a school's network, while fiber optics ensure fast and secure internet connectivity, which is crucial for various educational applications and resources. Our technicians are trained and certified to provide facility evaluation, technology consultation, design, project management, and installation for your structured cabling needs.

ACCESS CONTROL

Access control technologies enhance accessibility and security in schools, allowing administrators to track user activity and set flexible access times. By requiring credentials instead of keys, access control technologies ensure that only authorized individuals can enter specific areas, providing a sense of safety to students and staff.

CCTV SURVEILLANCE

Security cameras are another essential component of a comprehensive security system in schools. High-definition resolution, weatherproof capabilities, and mobile monitoring enable schools to monitor their premises effectively. Infrared mode and thermal imaging features allow cameras to capture clear images even in complete darkness, providing enhanced surveillance capabilities.

SMART SENSORS

Smart sensors are revolutionizing the way schools monitor and enhance safety within their premises. These sensors can detect various environmental factors, like air quality, vaping, gunshots, and chemicals, and alert school officials in real-time. Plus, they monitor temperature, humidity, and pressure to ensure the best learning environment for students.

CONSTRUCTION & DRILLING

In addition to our communication, network infrastructure, and security solutions, we partner with our sister company, Dark Horse Drilling, to provide directional drilling and boring, trenching, and outside plant construction. Whether laying utility lines, installing irrigation systems, or performing repairs, our expert team adopts safe, effective, and efficient practices to achieve your goals with minimal disruption.
